PROFILE

I'm a final-year Computer Science student at FAST-NUCES Karachi, graduating in June 2027. My focus over the past year has been DevOps and cloud infrastructure. I've deployed apps on AWS, built CI/CD pipelines with Jenkins and GitHub Actions, and added security scanning into the mix with tools like SonarQube and Snyk. That work has turned into two real, deployed projects so far, one of them built with a team. I'm now looking for a DevOps Engineer internship to keep growing in this space.

PROJECTS

SentinelForge: DevSecOps CI/CD Pipeline
Personal Project

- Built a self-hosted CI/CD pipeline that tests, scans, and blocks vulnerable code before deployment, integrating SonarQube (SAST), Snyk (SCA), and Trivy (container scanning) into Jenkins.
- Verified every security gate by deliberately introducing real bugs and vulnerabilities, confirming the pipeline correctly blocked each one, then fixing and confirming recovery.
- Solved a container tool-persistence issue by building a custom Jenkins Docker image with all required tools baked in, replacing manual reinstalls.
- Automated image builds, vulnerability scanning, SBOM generation, and deployment to AWS EC2 on every push via GitHub webhook.

Tools used: Jenkins, SonarQube, Snyk, Trivy, Docker, AWS EC2

LogSense: Intelligent Log Anomaly Detector
BS CS Semester Project | FAST-NUCES Karachi

- Set up and deployed the FastAPI + Next.js app on an AWS EC2 instance running Ubuntu using Docker and docker-compose, owning the whole server side of the project.
- Put Nginx in front as a reverse proxy and added HTTPS using Certbot, with the app tied to an Elastic IP.
- Wrote a GitHub Actions workflow that runs tests and redeploys whenever code is pushed to main.

Tools used: AWS EC2, Docker, docker-compose, GitHub Actions, Nginx, Certbot, FastAPI, Next.js, Ubuntu

EXPERIENCE

Co-Head Oct 2025 – Feb 2026
PROCOM'26 | FAST-NUCES Karachi

- Led a team of designers, coordinating with developers to ship an event platform used by 5,000+ participants.

EDUCATION

BS Computer Science 2023 – 2027 (Final Year)
FAST-NUCES Karachi

CERTIFICATIONS

- Decoding DevOps by Imran Teli on Udemy.
- DevSecOps & DevOps with Jenkins, Kubernetes, Terraform & AWS by Raghu on Udemy.

TECHNICAL SKILLS

- **Cloud:** AWS (EC2, S3, IAM, CloudWatch, VPC, ECR, CLI), Oracle Cloud (ARM VM)
- **CI/CD & IaC:** Jenkins, GitHub Actions, GitOps, ArgoCD, Terraform, Ansible, Docker, Kubernetes, EKS, Helm
- **Security:** SonarQube (SAST), Snyk (SCA), Trivy, gitleaks, OWASP ZAP (DAST)
- **Monitoring:** Prometheus, Grafana, Loki, Nginx, Caddy, Certbot
- **Backend:** FastAPI, Flask (Python), REST APIs
- **Tools:** Git, GitHub, GHCR, VS Code, Linux (Ubuntu), Bash
- **Languages:** Python, C/C++, SQL
